## Release Notice

This is the June 2023 release of MC Next 2023  
Release Notes.

## Introduction

---

These Release Notes describe new features and improvements in the MC Next 2023 software.

## New features and changes

---

- **Support Autodesk AutoCAD 2024** – This version includes support for the following AutoCAD products: AutoCAD 2024, AutoCAD LT 2024 & AutoCAD Civil 3D 2024 alignments.
- **Support Autodesk Revit 2024** – This version includes support for Revit 2024.
- **Support BricsCAD v23** – This version includes support for BricsCAD v23.
- **Point Cloud Comparison Wizard in Rhino** – A new point cloud comparison wizard in Rhino has been added. The wizard is ideal for processing flatness measurements.
- **Support Trimble FieldLink Project Files** – This version includes support for the Trimble FieldLink Project file format (\*.flproj).
- **Explode Dimensions in background files** – In this version, you can automatically explode dimensions in background files (AutoLISP required).
- **Export Settings in Revit** – A new Export Settings dialog in Revit has been added. You can now enable or disable point groups in Revit that you want to export to the MC Next software.
- **Improved Auto Insert over Families wizard in Revit** – The Auto Insert over Families wizard in Revit has been improved. More options are now available under “Use property of the host element” which can be used as point number or point description.
- **Improved Auto Insert over Markers wizard in Revit** – The Auto Insert over Markers wizard in Revit has been improved. More options are now available under “Use property of the host element” which can be used as point number or point description. Similar to the Auto Insert over Families wizard.
- **Added Point description to the Auto Insert Wizards in Revit** – The Auto Insert Wizards in Revit have been improved. You can now specify a point description in the Auto Insert Wizards.
- **Bugfix Renumber Duplicate Points in Revit** – In this version, when you copy / paste points in Revit, duplicate points will now be correctly renumbered.
- **Getting Started Guide Update** – The MC Next Getting Started Guide has been updated with the latest Ribbon User Interface and new features in CAD, Revit and Rhino.

## Technical support

---

If you have a problem and cannot find the information you need in the product documentation, please contact your local dealer. Alternatively, you can go to the Support area of the MOUS Software website ([www.moussoftware.com](http://www.moussoftware.com)). Select the product you need information on. Product updates, documentation, and any support issues are available for download.

If you need to contact MOUS Software, please email [support@moussoftware.com](mailto:support@moussoftware.com)

## System Requirements

---

- **Operating system** – Microsoft® Windows® 7, Windows 8, Windows 10 or Windows 11 (32- and 64-bit versions)
- **Privileges** – Administrative Privileges on the system
- **Hard disk space available** – 450 MB of disk space required
- **Monitor** – 1024 x 768 or higher resolution with 256 or more colors (at 96 DPI)
